

FNP Sales Analysis Dashboard - Executive Summary

Project Overview

The FNP Sales Analysis Dashboard is an interactive Power BI solution that analyzes sales performance, customer behavior, product performance, delivery efficiency, and revenue trends. It transforms transactional data into actionable business insights.

Business Objectives

Monitor sales performance, identify top-performing occasions and product categories, analyze customer spending, evaluate delivery efficiency, understand seasonal demand, and support data-driven decision making.

Key KPIs

- Total Orders: 1,000
- Total Revenue: ₹35,20,984
- Average Order-to-Delivery Time: 5.53 Days
- Average Customer Spend: ₹3,520.98

Dashboard Highlights

Revenue by Occasion, Revenue by Category, Top 10 Cities by Orders, Revenue by Month, Top 5 Products by Revenue, Revenue by Order Hour, and interactive filters for Order Date, Delivery Date, and Occasion.

Key Business Insights

Anniversary and Raksha Bandhan generate strong revenue. Colors is the highest-performing category. Peak sales occur during February and August, with higher ordering activity in the evening. Average customer spend is approximately ₹3,521 and average delivery time is 5.53 days.

Business Benefits

Supports faster executive decision-making, optimized inventory planning, targeted marketing campaigns, improved logistics, better product strategy, and enhanced customer experience.

Technologies Used

Microsoft Power BI, Power Query, DAX, and Microsoft Excel.

Conclusion

The dashboard provides a centralized view of sales and operational performance, enabling management to identify trends, measure KPIs, and make informed strategic decisions that improve revenue and operational efficiency.
